72nd
Year

ROSE, PEACE
Patent No. 591

FOREWORD

THE season behind us has been a good one, but with the persistent optimism of our trade, we are expecting much more of the one to come.

Prices on some important items are down quite noticeably in this catalog—Azaleas, Camellias, Fruit Trees, Hibiscus, to name only a few. With respect to container-grown plants, the reductions are in many instances startling. This is a direct result of economies in procedure and of increased production of this type of stock to meet demand.

There are a few things that handle better from containers. Ask about them when you order, and give canned stock a try. It may save you time and money and will **CERTAINLY** remove most of the risk in planting.

Be sure to study carefully our "Bargain Bundles." See if you can't save by making one of them fit your needs.

Our new prices come out in early fall of each year. The new price-list, like this one, will be mailed to you at that time upon request.

Glen Saint Mary Nurseries Co.

Glen Saint Mary, Florida

TELEPHONE: Glen Saint Mary No. 186-W

TERMS OF BUSINESS

LOCATION

General Office and Nurseries at Glen Saint Mary, Baker County, Florida, on Seaboard Air Line Railway and U. S. No. 90, 30 miles west of Jacksonville. Office and Citrus Nurseries at Winter Haven, Polk County, Florida. The office is not open for business on Sundays, and during the summer we are closed on Saturday afternoon. We recognize most national holidays, such as Fourth of July, Labor Day, Thanksgiving, Christmas, New Year, etc. Visitors who come to the Nursery in disregard of this notice are welcome to look around, but must not expect the help of a salesman or to have plants dug.

APPLYING PRICES

Orders for five (5), fifty (50), and five hundred (500) plants of one class command the 10, 100, and 1000 rates respectively. Prices herein are for the Retail trade only and cancel all previous lists and catalogs. They are based on current conditions and therefore subject to change without notice.

CASH

or satisfactory reference must accompany all orders for immediate shipment unless the person ordering has an account. On orders booked in advance of the shipping season, 25 per cent down, with the balance due when the shipping season opens, will be required. Reserve orders are accepted only upon condition that they shall be void should injury befall the stock before shipment, from any cause not under our control. Stock held in our fields on reserve long enough to grow to a larger grade will be billed accordingly at shipping time.

OUR PRICES

do not include transportation costs. Be sure to state clearly when ordering how you wish shipment made—by Parcel Post, Express, Commercial Truckline or Freight. Lacking this information, we will use our best judgment as to method of forwarding. On orders for shipment by Parcel Post, *add 25 per cent to total amount of order* to cover cost of packing and postage. Unused balance of remittance, if any, will be refunded when invoice is mailed. Heavy shipments that would be expensive by Express can usually travel *via* Commercial Truckline nearly as quickly as by Express, and for less cost. Please use our order blanks; additional ones will be mailed on request.

SHIPPING AND PLANTING SEASON

from the middle of November to April for bare-root plants covers the average season, but weather conditions each year govern beginning and ending dates. A "Bare-Root" plant or tree is dug without soil, pruned root and top for planting by the purchaser, and packed for shipment in damp moss or other suitable material. "B&B" means Balled and Burlapped. A Balled and Burlapped plant or tree is dug with soil on the roots, tightly wrapped with burlap and tied securely with twine. Balled and Burlapped materials may be safely moved almost every month of the year.

GUARANTEE

We guarantee our stock to be well grown, true to name, properly packed, and shipped according to instructions. In no case shall our liability be more than the original invoice value. There shall be no nursery stock sold under a guarantee to live, except with the understanding that, if it dies, it will be replaced *as soon as possible*, at not less than 50% of purchase price. Claims for replacement must be made in writing within three months after receipt of plants.

CLAIMS

If, by any possibility, errors should occur, they will be promptly rectified, if claim is made within 10 days after the receipt of goods. Our responsibility, except as stated above, ceases upon delivery of nursery stock in good condition to public carrier.

SHRUBS AND HEDGE PLANTS

ABELIA grandiflora

ABELIA grandiflora. One of our very best evergreen shrubs for foundation plantings, corner groups, single specimens, or ornamental hedges. The small leaves are bright glossy green, turning to a beautiful bronze in winter. Its flowers come in early May and the plant is covered with bloom until late autumn.

CARISSA grandiflora (Natal Plum).

Tall, growing to 18 feet. evergreen shrub with fragrant white flowers about 2 inches across. The scarlet fruit is edible.

	Each	10
Gallon cans.....	\$1 25	\$11 50

CASSIA artemisioides. A grand little shrub for dry sunny places where the rounded form, feathery, silvery gray foliage and bright yellow, fragrant flowers show to advantage.

bicapsularis. Showy legume bearing bright yellow bloom profusely in late summer and fall. Grows to 10 feet; evergreen in temperate climates.

	Each	10
Gallon cans, 12 to 18 in...	\$1 00	\$9 00
Gallon cans, 18 to 24 in...	1 25	11 50

CESTRUM nocturnum (Night-blooming Jessamine). A shrub 6 to 9 feet high, adapted to south Florida. The branches are curved and willowy, producing creamy yellow blooms that are fragrant at night

	Each	10
Gallon cans.....	\$1 25	\$11 50

CHALCAS paniculata (Orange Jessamine). For south and central Florida this exotic plant makes a handsome shrub. Leaves are shiny, small and plentiful. Abundant blooms looking and smelling like small orange blossoms frequently appear at same time as red fruits. Usually blooms several times a year.

	Each	10
Quart cans.....	\$0 90	\$8 00

CLEYERA japonica. A fine evergreen shrub with rather thick, glossy leaves and creamy white, fragrant flowers. Berries red in early fall. An upright grower, reaching a height of 10 to 12 feet. Will withstand wet or dry situations with equal ease and seems to have few insect or disease enemies. We recommend it highly for trial as far north as Atlanta inland or Wilmington, North Carolina, on the coast.

8 to 12 in.....	\$1 75	
12 to 18 in.....	2 50	
18 to 24 in.....	3 50	

HIBISCUS. More strongly than ever we are convinced that the Hibiscus, in many of its myriad forms, is making its way slowly but surely into the gardens of temperate zones.

Some varieties have not survived the test of trial or the critical eye of the connoisseur. We are now bending our energies toward the best of those that can be grown from cuttings in order to avoid, for one thing, the disappointment that freezing weather can bring. Cutting-grown Hibiscus retains its identity even though killed to the ground and is able to "carry on" in an amazingly short time.

American Beauty. Single. Very large, bright pink, a shade lighter at edges.

Betty Chalk. Medium-sized, brilliant self-colored violet-pink.

Columbia. Double. Bright rose.

Hawaiian Cream. Single. Light fawn shaded pink, white veins.

Kona. Double. Bright silver-pink.

Madam X. Loose double. From white to bright pink in center. Vigorous.

Peachblow. Double. Light peachy pink.

Pink Versicolor. Single. Medium pink marked with white stripe on reverse of petal.

Red. Double.

Red. Single.

Assorted Varieties.

Cutting Grown.	Each
Quart cans.....	\$0 60
Gallon cans.....	1 15

HYDRANGEA hortensis. Ornamental deciduous shrubs adapted to shady and half-shady locations. The white varieties bloom true to color; the others may be pink or blue depending upon soil and culture. Pink blooms may usually be turned blue by the use of extra acid in the soil and blue varieties changed to pink by sweetening the soil with lime. Valuable as pot-plants indoors or used outside as flowering shrubs. The different varieties cover a long blooming season.

MAGNOLIA soulangeana

MAGNOLIA fuscata (*Michelia fuscata*; Banana Shrub). A splendid, hardy, broad-leaved evergreen with dark, glossy foliage. The creamy yellow flowers look like miniature bananas and the fragrance is identical. This shrub may be trimmed or left to grow naturally, often reaching a height of 15 to 20 feet.

B&B.	Each	10
12 to 18 in.....	\$2 25	\$21 00
18 to 24 in.....	3 25	30 00
2 to 3 ft.....	4 75	45 00
3 to 4 ft.....	6 00	57 50

MAGNOLIA liliflora (*M. purpurea*). This beautiful Chinese Magnolia will grow to a height of 10 feet. The tulip-shaped flowers, opening before the leaves appear, are purple outside and white inside. It is a midseason bloomer.

liliflora nigra (*M. soulangeana nigra*). Very much like Soulangeana except that flowers are longer and of darker color. Midseason bloomer.

rustica rubra. Dark red, cup-shaped flower blooming a week or so later than Soulangeana. A very fast grower.

soulangeana. Hardy in northern gardens, this fine variety has flowers that are pinky purple on the outside and nearly white within. Usually blooms before foliage appears in spring. (Deciduous.)

PEACH, FLOWERING, Helen Borchers. Double-flowered variety. The clear pink flowers average over 2 inches across; petals are ruffled and incurved. When cut for use in the home, the blooms hold up unusually well. The tree is a vigorous grower, particularly when planted on medium to heavy lands. When these are not available, a mulch of straw or leaves will help achieve the same purpose.

Bare-root.	Each	10
2 to 3 ft.....	\$2 50	\$24 00

formosana. The productiveness of this improved variety is amazing! Fruit is a deep glossy red borne in immense clusters. The growth resembles *Lalandi* but is not so upright.

Each		
Gallon cans, 18 to 24 in.....	\$1 85	\$17 50

Pyracantha Seedlings Each 10
6-in. pot, 18 to 24 in....\$1 35 \$12 50

QUINCE, FLOWERING (*Cydonia japonica*). We do not hesitate to recommend both the red- and the pink-flowering varieties for vivid and profuse spring color. They have been grown at Glen Saint Mary for several years now with good success. Half deciduous in this section, they seldom attain more than 5 feet in height, with about the same spread. Spiny branches; leaves 2 inches long, coarsely toothed. Flowers average 1 inch in diameter and are orange-scarlet or salmon-pink—two distinct types, so far unnamed here. Both mature yellow fruit.

Red Pink

2 to 3 ft.....	3 35	31 50

Our Ligustrums Are Grafted

They may cost a little more at first, but when you consider their freedom from root-knot (nematode) and consequent longer and more vigorous growth in southern Florida and similar situations, the original outlay is well spent. A disease-resistant Privet is used for rootstock.

Iwata. An intermediate grower with small, slightly mottled foliage. Ideal for low foundation plantings and hedges.

Lucidum (Wax-leaf Privet). Very bushy, with rich dark waxy leaves and panicles of white flowers followed by large bunches of black berries. For foundation plantings, hedges and specimens.

HOLLIES (Ilex)

These fine evergreen trees and shrubs are unsurpassed in beauty and in popularity by any of our broad-leaved evergreens. They succeed over a wide range of territory and have been extensively planted in nearly all portions of the United States. Hollies are very desirable at all seasons of the year, but especially so at Christmas when the berries are highly colored and at their best.

All our American Hollies are grafted from the finest selected strains of fruiting trees and are much superior to seedlings. Choose any one offered below; or, better still, order the whole collection, and you will never again be satisfied with ordinary Hollies.

Croonenberg. A Greenbrier origination. Upright, rather compact grower with fine dark green foliage of larger than average size and spiny leaves. Berries are a good red and are produced when the trees are still very young.

Dahoon (Cassine). This native evergreen variety is very satisfactory in the South but is not recommended for the colder sections of the country. The tree is low and spreading in habit, and the leaves are bright and glossy, without spines. It is a heavy bearer, the branches being literally covered with bright red berries.

East Palatka. Foliage light green, of medium size, almost smooth, and resembling Dahoon Holly in appearance. A regular bearer of immense quantities of bright red berries.

Ft. McCoy. Narrow, very spiny leaves on slender branches distinguish this variety. Berries abundant. May be readily trimmed.

Howard. The most popular variety we grow. Foliage very dark and glossy, with some spines; berries red and attractive. Excellent.

Hume No. 1. A vigorous grower, spreading in habit, with large, almost spineless leaves. Bears regularly. The fruit is red and of large size.

Male Holly. On rare occasions it becomes necessary to use one of these trees bearing strictly staminate flowers to insure berry production on other fruiting Hollies. Ordinarily our grafted trees do not require bloom fertilization from outside, but if necessary, one of the Male trees planted in fairly close proximity will remedy the trouble.

Savannah. An attractively upright and rapid grower, this Holly attains true form sooner than most. Foliage abundant, leathery, bright. Berries good size, of fine color. Leaf petioles and branch tips are purple in new growth.

Taber No. 3. A very distinct and outstanding variety. Foliage dark green, large and spiny; fruits large, bright red and showy. Maintains a perfect pyramidal form without pruning.

Taber No. 4. This very fine strain grows to a great height. It has slightly drooping branches which give it somewhat the effect of a huge fountain. The fruits are bright red and very large.

MAGNOLIA grandiflora. The great Bull Bay is the South's finest native evergreen tree; forest specimens often reach a height of 80 feet. The trees are roughly pyramidal in form with heavy leaves 5 to 8 inches long, glossy dark green above, and covered with soft brown felt beneath. The picture made by one of these magnificent trees in the sunlight, is one of which any home-owner may be justly proud. The flowers, which are produced over a period of two to three months in summer, are great waxy, creamy white saucers, 7 to 8 inches across, each bloom with a mass of yellow stamens and giving out a delightful fragrance. Its flowers are followed by large pods covered with brilliant red seeds. Years ago we found that there was a great variation in seedlings, so we selected the most perfect types and grafted from them. In this way we have built up a strain, which we have named Saint Mary, that is superior to the wild trees and, we believe, to any stock in commerce anywhere. Our trees are uniform in size, shape, foliage and flowers, making them especially desirable for street planting.

grandiflora, Saint Mary.

Gallon cans, 18 to 24 in.....	1 25
Gallon cans, 2 to 3 ft.....	1 50

OAK (Quercus)

Basket Oak (*Quercus prinus*). Often attains 100 feet. Leaves deciduous, to 7 inches long, coarsely toothed, shiny bright green above and grayish pubescent beneath. The acorns are over an inch in length. A relatively fast grower.

Live Oak (*Q. virginiana*). Famous both as landmarks of southern history and for their majestic beauty. A long-lived and slow growing variety, this evergreen tree reaches 60 feet in height and spread. The shining dark green leaves are elliptic to oblong.

OAK, continued

Water Oak (*Q. aquatica*; *Q. nigra*). A tall and fast-growing Oak—to 80 feet. Nearly evergreen in our climate. Bluish green leaves about 3 inches long.

REDBUD (*Cercis canadensis*). The American Redbud or Judas Tree is a small, nicely shaped, deciduous tree with rounded leaves and produces an abundance of rosy pink flowers in early spring. As the blooms appear before the foliage, a Redbud in full flower is a lovely picture.

chinensis. An Asiatic Redbud with purplish pink flowers. Individual blooms, often measuring $\frac{3}{4}$ inch in length, are borne in heavy clusters along the branches. Ultimate height is said to be around 50 feet and the rate of growth is somewhat faster than that of *Canadensis*. The foliage and general appearance of the tree is very similar to that popular and well-known type.

CONIFEROUS EVERGREENS

ARBORVITAE

These are classified as Thujas by botanists and are also listed as Biotas. Most of those used in the South belong to the species *Thuja orientalis*. They are beautiful shrubs of compact, symmetrical growth, especially suited for formal gardening when used alone or for mass and foundation plantings when combined with other shrubs. The Thujas are hardy and thrive on any moderately good soil.

Aurea conspicua (*Thuja orientalis*). Deep yellow to golden often varying to green. Tall, compact, upright.

JUNIPERUS pfitzeriana

ORNAMENTAL AND LAWN GRASSES

RETINOSPORA, *Pisifera squarrosa veitchi*

RETINOSPORA

Botanists know these by the generic name *Chamaecyparis*. Those commonly found in southern gardens are mostly varieties of *C. pisifera*. Their forms and shades are many and varied. A number of lovely varieties are adapted to southern conditions.

Obtusa ericoides. This is a beautiful conifer, dense and compact in growth. An upright grower that may be pruned in very narrow, columnar shape. The foliage is a dark bluish green. Not particular as to soil.

Ericoides, Barton Strain. Brought to our attention by the late J. O. Barton, who was our packing-house foreman for many years. Of slower and more compact growth than *Ericoides*, and softer texture.

B&B.	Each	10
12 to 18 in.....	\$1 35	\$12 50
18 to 24 in.....	1 75	16 00
2 to 3 ft.....	2 75	25 00

5 to 6 ft.....	8 50	80 00
6 to 8 ft.....	10 50	100 00

SEQUOIA gigantea. From the West Coast comes this stately tree, often attaining 100 feet or more. Narrowly pyramidal when young, bearing decorative cones. Foliage somewhat like Cypress.

Each
Gallon cans, 8 to 12 in.....\$2 50

BERMUDA GRASS (*Cynodon dactylon*).
A favorite for lawn purposes in the Lower South. Spreads rapidly.

CARPET GRASS (*Axonopus compressus*).
A valuable lawn grass widely used in locations having plenty of moisture. It resembles St. Augustine Grass and retains its color well in cool weather. Carpet Grass does very well for large estates if the soil is moist to wet and if larger mowing equipment is available. Responds to fertilization, and mowing at 2 to 3 inches is recommended. Each Bu.....\$2 25
In lots of 5 bu. and up.....2 00

CENTPEDE GRASS (*Eremochloa ophiuroides*). Centipede is one of the best lawn and pasture grasses for the South. Spreads by surface runners and is excellent for sunny lawns, both dry and moist soils. Centipede does not thrive under alkaline or excessive lime conditions and should not be fertilized at excessive rates. High fertilization causes a heavy mat of grass with roots out of the soil and makes it susceptible to drought and disease. Close mowing at less than 2 inches is recommended. Will set about 1200 square feet per bushel when set 1 foot apart each way.

Each
Bu.....\$2 50
In lots of 5 bu. and up.....2 25

OPHIPOGON japonicum. A low-growing Ophiopogon with very narrow, dark green leaves. Excellent ground-cover and border plant. Each 10
2 to 4-bib clumps.....\$0 15 \$1 40
5 to 7-bib clumps.....20 1 90

PAMPAS GRASS (*Cortaderia argentea*).
Fine, handsome clumps 6 to 8 feet high. Very ornamental for screens and specimens. Each
Small clumps.....\$1 60
Medium clumps.....2 15
Large clumps.....3 00

ST. AUGUSTINE GRASS (*Stenotaphrum secundatum*). A broad-leaved grass excellent for shady locations. May be grown close to salt water. Sets about 800 square feet per bushel when set 1 foot apart each way. Each
Bu.....\$2 50
In lots of 5 bu. and up.....2 25

ST. AUGUSTINE BITTER BLUE STEM GRASS (*Stenotaphrum*). Bitter Blue St. Augustine is one of our better lawn grasses, if not the best, for certain locations. Shaded lawns, coastal lawns or those subject to salt sprays, moist to wet soils, and those too alkaline for Centipede will support good Bitter Blue. Responds best to mowing at about 2 inches. Too close cutting of this grass is harmful. A much-improved type, stronger growing, tougher, and extremely resistant to chinch-bugs. Throughout the year it seems to keep its color better than most southern grasses, will stand more dry weather, and is equally at home in sun or shade. One bushel will plant about 900 square feet of lawn if the grass is set a foot apart each way, or 450 square feet if spaced 1 foot by 6 inches. Each
Bu.....\$3 00
In lots of 5 bu. and up.....2 75

PALMS AND CYCADS

COCOS australis. A beautiful Palm, of vigorous growth, with grayish green, curved leaves. A very hardy sort, and one of the finest Palms for the Gulf Coast country.

INDIAN AZALEAS

Azalea indica

The Indian Azaleas are evergreen shrubs with large, single or double flowers that sometimes measure 4 inches across. Some are slow-growing, practically dwarf, while others grow rapidly into large shrubs. Colors are varied and very beautiful.

RED and DEEP PINK

Brilliant. Early to midseason. Compact, bushy plants with small leaves. Free bloomer, bearing flowers of deep rose-pink.

Southern Charm. A sport of Formosa in clear rose-red. The flowers are large and blooming time is about the same as its parent; midseason. Strong grower with good dark green foliage.

INDIAN AZALEAS, continued

SALMON

Duc de Rohan. Early. Semi-hardy, bushy, very free flowering. Medium-sized flowers.

Frederick the Great. Late. Low, bushy, compact growth; very free flowering. Deep salmon color.

Glory of Sunninghill. Late. A hardy, bushy, compact grower with good foliage; free bloomer. Flowers of medium size. One of the best in this color.

Lawsal. Midseason. Hardy, rather bushy. One of the best.

WHITE

Fielder's White. Early. Large, pure white flowers. Strong, upright grower; free blooming.

New White. Early. A bushy grower with deeper green foliage than Fielder's and smaller flowers.

VARIEGATED

George Lindley Taber. Our own origination, named for our founder. Soft lavender-pink, faintly streaked darker pink and mottled cerise. Slightly fragrant. A rapid grower, resistant to cold. Usually blooms here in March.

LAVENDER

Formosa. Midseason. Very large flowers of lavender-lilac. Hardy, easy to grow.

LIGHT PINK

Elegans. Early. A fast grower of rather open habit. Free flowering and easy to grow. Flowers of medium size.

Elegans Superba (Pride of Mobile). Midseason. Similar to Elegans but more compact in growth. Flowers are larger and brighter pink.

George Franc. Early. Hardy and bushy. Bears large flowers in profusion.

Macrantha. Very late. A hardy summer-blooming type. Bushy, compact grower. Single.

Macrantha, Double Pink. Late. Beautiful clear pink blooms with two or three layers of petals. Good compact grower.

ORANGE

Macrantha. Very late. Hardy, summer blooming bushy type; good foliage. Medium-sized flowers.

President Clay. Early. Tall, open growth; free flowering. Medium-sized blooms.

Prince of Orange. Midseason. Compact grower; free flowering. The good-sized, deep orange-colored flowers are well mixed through the luxuriant foliage.

Sublanceolata. Late. Tall, open-growing plant with large leaves. Flowers deep orange, very large and extremely showy.

KURUME AZALEAS

Shade grown. Though of rather slow growth, Kurume Azaleas make good-sized specimens, and their compact form makes them the equal of other evergreen shrubs even when not in flower. Very small plants will bloom, and each season as they increase in size they increase in beauty.

RED AND DEEP PINK

Christmas Cheer. Midseason. Hose-in-hose flowers of Christmas red. Compact, hardy.

Hexe. Midseason. Hose-in-hose blooms of deep red. Low, dense growth.

Hinodegiri. This is one of the most brilliant of all the dwarf Azaleas and is a profuse bloomer over a long period. It is a shapely plant, with round, evergreen foliage. Makes a fine pot-plant or an ideal low hedge.

LIGHT PINK

Coral Bells. Midseason. Dainty shell-pink, deeper in the center. Hose-in-hose type. Profuse blooms.

Sweetheart Supreme. (Pericat type.) The medium-sized, blush-pink, hose-in-hose flowers resemble a Sweetheart rose. An excellent grower of compact habit, with dark green foliage.

FINEST SELECTED STRAINS OF FRUITING TREES. SEE PAGE 8

CAMELLIAS Class A

GS. refers to French importations from Guichard Sisters, Nantes, France.

Adolphe Audusson. (GS.) A very large, semi-double flower of deep red with distinctly darker veins. The long yellow stamens are in a cluster in the center and occasionally there are a few petaloids. The dark green leaves are thick, with serrated margins.

Alba Plena. Full double, very regularly shaped, wax-like pure white. Early.

Anna Bruneau. This double, deep pink rosebud-form Camellia is a late bloomer, resembling Mathotiana Alba in form. Foliage is large, deep glossy green. Growth upright.

Fred Sander. Flower deep red, occasionally spotted with white. Quite unusual and very desirable.

General Lamoriciere. (GS.) Large, semi-double flower of palest pink, striped with deeper pink; yellow stamens interspersed.

Gigantea. (GS.) A spreading plant with enormous leaves. The large peony-form flowers are deep red, splashed with white.

Il Tramonto. (GS.) Very large, full double flowers with long, rather narrow petals of a beautiful soft rosy pink, marbled white. A very lovely variety.

Kellingtonia. (GS.) The French Kellingtonia is quite different from the variety of the same name grown in this country. The flower is very large and handsome, sometimes only semi-double, while at other times it shows a full center of petaloids and stamens. A very rich shade of red with varying amounts of white.

Lady Clare (Empress). Large, semi-double, rose-pink flowers of crepe-like texture; prominent stamens. Hardy; vigorous.

Lady Mildred. Large, semi-double flowers with pink filaments. This seedling was selected at Glen Saint Mary Nurseries.

Magnoliaeflora. This delicately beautiful Camellia is very choice. The semi-double flowers, with 12 to 15 very large petals, are deep rose at the base but pale to soft blush at the tips. The plant is a compact grower with attractive foliage.

Marguerite Gouillon. (GS.) A flower so deep-centered that the fully opened bloom is nearly round. Full peony-form, with a center of palest flesh-pink, slight striations of deeper pink at the tips of the petals, and more decided markings on the outer petals.

Mathotiana. An enormous, full, rose-formed flower with deep rose-red petals that take on a violet tint as the flower matures, and when fully open, a few stamens show. A vigorous grower with good green foliage. One of the finest of the red Camellias.

Mathotiana Rosea. (GS.) Very large, rose-shaped flower of a beautiful shade of pink—a perfect Mathotiana type.

Valtevarado. (GS.) A very fine variety. The flower is full double and perfectly symmetrical. Cup-shaped, with pale pink center petals shading to a deeper rose on the outer petals. A strong grower with very fine foliage.

William S. Hastie (Colonel Firey). A truly magnificent flower of deepest red, very large and full double, with many rows of petals. Good foliage and a late bloomer.

CAMELLIAS, Class B

GLOIRE DE NANTES

Campbelli. (GS.) A late bloomer, this fine turkey-red, formal-type Camellia is produced abundantly on a compact plant. Foliage glossy dark green.

Comtesse Canarii. Imbricated salmon.

Debutante (Sara C. Hastie). Peony type, soft pink. Hardy. Early.

Elegans (Chandler). Very large, incomplete double, cherry-red to rose-pink spotted with white.

E. L. Steele. Brought to our attention by the late E. L. Steele, a past president of our Company. Pure white, about 3 to 4 inches in diameter. The flowers are high-centered, of incomplete double form, with yellow stamens interspersed. Usually at its best in January and is remarkable for its prolific blooms borne on a strong bush. Foliage of good size, fine dark green. One of the best whites we know and not so temperamental as many others.

Enrico Bettoni. Very large, full peony-form flowers of clear satiny rose-pink. The petals in the center are erect and sometimes folded back, while the outer petals are fluted and deeply notched. Stamens are interspersed, even to the outside rows of petals.

Geante des Batailles. Small, peony form, variegated turkey-red with white blotches. The center is a compact mass of petaloids.

Gloire de Nantes. Large, semi-double, very deep rose; long yellow stamens.

Herme. Large, peony form; white with red and pink stripes and blotches. A rapid and rather upright grower.

Latifolia (Fanny Bolis). (GS.) Flower medium size, semi-double, variegated carmine with white blotches. Stamens usually centrally clustered. A free bloomer from December through March. Hardy; vigorous and symmetrical.

*We are members of the
Holly Society of America*

Margherita Caleonie. (GS.) Double flower of medium size. Petals variegated crimson, spotted and washed with white.

Marie Morren. (GS.) Flower medium to large, self rose-madder with deeper veins. There are 46 petals, the outer ones sometimes flecked with white. They are nearly always complete double imbricated, but occasionally are in- completely tiered.

Pink Perfection (Frau Minna Seidel). Medium size; shell-pink, wax-like petals in perfect double formation. Early and free flowering.

Pink Star. Irregular, semi-double, bright rose-pink with yellow stamens interspersed with the petaloids. The flowers are large, with pointed outer petals, giving a star-like appearance. Rather slow growing but a heavy bloomer.

Prince Eugene Napoleon. Double bright red flowers of good size. Early to mid-season.

Professor C. S. Sargent. Very double, peony-form flower of bright scarlet, with a row of larger petals around the edge. Semi-dwarf; very free bloomer.

Victor Emmanuel. This Camellia is outstanding because of its great beauty of form and its brilliant coloring. The flowers are peony form and of a deep rich red. Its petals are raised and slightly fluted and the stamens are in one large central cluster. The plant is compact, with deep green foliage, and blooms from midseason to late.

Virginia Franco. (GS.) Pinky white ground striated with deeper pink.

PROF. C. S. SARGENT

We specialize in Mathotianas and have hundreds of beautiful plants in various sizes. This variety has stood the test of time and is still one of the most satisfactory Camellias in its class.

CAMELLIAS, Class C

Angela Cocchi. (GS.) Variegated; sparsely marked with carmine stripes on flesh-pink, almost white ground. The blooms are medium size. This is one of our French importations and is very lovely.

Celtic Rosea. Formerly Semi-Double Blush. Propagated from a French import. Semi-double, with petals of the palest blush-pink. Long yellow stamens. Very dainty and beautiful.

Christmas Glory. Small, peony form, turkey-red to rose-madder. The center is made up of small, folded, somewhat twisted petaloids interspersed with large, folded, curved ones, making a flower of unusual form and interest.

Elizabeth. White; double; petals are crinkled. Although the majority of flowers are white, a few have a slight pinkish tint. It is a strong grower. Foliage dark green.

Haley's Monarch. A tall, strong-growing, late-blooming variety with rather large foliage. The flower is semi-double and a good shade of light pink.

Horkan. A fine variety with semi-double flowers, variable in coloring, but white usually predominates, with pink or rose markings. Interesting and attractive.

Imperator. (American.) Incomplete double, turkey-red; medium size, free flowering. Desirable.

Jarvis Red. Semi-double, blood-red flowers of good size, with yellow stamens showing among the petals. A rapid grower, flowering late.

Mme. de Strekaloff. A flat double flower with old-fashioned candy stripes. Upright, strong grower.

Sacco Rose. The blooms are of medium size, complete double, regular imbricated. Color carmine-pink. Leaves dark green, on nicely shaped plant.

Takayama. Flowers tend to be small; self carmine shading lighter toward center. Of regular imbricated form. The blooms are borne profusely and the whole effect is most pleasing.

Theresa Massini. Colorshell-pink, similar to Pink Perfection, and foliage on the same order. Leaves small and growth compact.

T. K. Variegated. Semi-double, pale pink with shadings of deeper pink and lavender; large cluster of yellow stamens.

ROSES

Glen Roses are back!

Most of the fine old-timers that have become so intimately associated with Southern living are available once again in all their profusion of color and glorious aroma.

Together with several well-tried newer ones, we can now supply the "Queen of Flowers" in a diversity of growth and type to appeal to any Rose fancier. Rootstock is Multiflora; we know of no better for our part of the country.

We cannot ship orders for less than 5 Roses.

These may be assorted varieties.

Patented Roses

Donald Prior. Floribunda. Patent No. 377. Brilliant scarlet. \$1.50 each.

Eclipse. HT. Patent No. 172. Pure yellow. \$1.75 each.

Edith Willkie. HT. Patent No. 500. Shrimp-pink, suffused yellow. \$1.75 each.

Fashion. Floribunda. Patent No. 789. Brilliant luminous coral overlaid with gold. \$2.00 each.

Heart's Desire. HT. Patent No. 501. Red. \$1.75 each.

High Noon. CHT. Patent No. 704. Lemon-yellow climber. \$2.50 each.

Mabelle Stearns. HSet. Patent No. 297. Silvery pink. \$2.00 each.

McGredy's Sunset. HT. Patent No. 317. Soft yellow. \$1.75 each.

Mirandy. HT. Patent No. 632. Garnet-red; sweet spicy fragrance. \$2.25 each.

New Yorker. HT. Patent No. 823. Velvet scarlet; abundant bloom. \$2.00 each.

Peace. HT. Patent No. 591. Yellow suffused with pink and white. \$2.50 each.

Tallyho. HT. Patent No. 828. Pink inside petals, crimson to scarlet outside. \$2.00 each.

World's Fair. Floribunda. Patent No. 362. Deep velvety red, nearly black. \$1.50 each.

ROSES ON MULTIFLORA ROOTSTOCK

Class Abbreviations Used:

HT., Hybrid Tea; HP., Hybrid Perpetual; T., Tea; C., China; CT., Climbing Tea; CHT., Climbing Hybrid Tea; FL., Floribunda; HG., Hybrid Gigantea; LC., Large-flowered Climber; N., Noisette.

PINK BUSH ROSES

Antoine Rivoire. HT. Delicate silvery pink shading to peach in center. Flowers medium size, double. Bush seldom mildews and is free bloomer in spring and fall.

Betty Uprichard. HT. Tapering buds, opening into beautiful two-toned flowers with upper side of petals light pink and deep rose-pink underneath. Disease resistant.

Cecile Brunner. FL. The little Sweet-heart Rose has exquisite pink buds that open to graceful double flowers of light pink with yellow base. A grand little Rose.

Countess Vandal. HT. Long-pointed, coppery orange buds opening to large, double, high-centered flowers on long stems. Richly fragrant; the color is pink suffused with salmon. Fine for cutting.

Dainty Bess. HT. Distinctly different type. Flower 3½ to 4 inches across, single, broad-petaled, with crinkled edges, delicate rose-pink. The prominent stamens remind one of Cherokee.

Edith Nellie Perkins. HT. Deep pink with copper shadings at base of petals. Well-formed bud and flower.

Editor McFarland. HT. The finest deep pink. Long lasting.

Else Poulsen. FL. Large clusters of semi-double, bright pink flowers, moderately fragrant, and very lasting. A continuous bloomer, even through the intense heat of a Southern summer.

Mme. Lombard. T. The strongest-growing pink in our collection. Can be grown in tree form.

Mrs. R. M. Finch. FL. Fine flowers of rosy pink, becoming lighter, borne in large clusters. Vigorous grower and continuous bloomer. Fine for shrubbery plantings and hedges.

Pink Killarney. HT. Large, almost single, delicate pink blooms, opening wide.

Pink Maman Cochet. T. Nicely formed buds and flowers of pale pink, deeper at center. Fine for cutting.

PINK CLIMBING ROSES

Belle of Portugal. HG. Extremely large flowers of lovely pink tinged with salmon.

Ednah Thomas. CHT. Large double flowers of salmon-rose flushed orange. Fragrant. Continuous bloom.

Pink Killarney. CHT. Same as bush type, except growth habit.

Pink Radiance. CHT. Same as bush type, except growth habit.

You will find membership in the American Rose Society to be a great help in growing Roses. Address the Secretary, 1316 Derry St., Harrisburg, Pa.

ROSES ON MULTIFLORA ROOTSTOCK, continued

RED BUSH ROSES

Ami Quinard. HT. A lovely deep, rich velvety crimson-maroon. Blooms of medium size, fragrant, lasting for several days. Vigorous and blooms freely.

Black Prince. HP. Produces large, dark crimson flowers, nearly black at times. Very strong grower.

Eto le de France. HT. A truly excellent Rose. Large, very fragrant, crimson flowers.

Etoile de Hollande. HT. Gorgeous deep red. Blooms all summer.

His Majesty. HT. Blooms of good size, fragrant, dark crimson, deepening toward edges. Abundant bloomer. Good stems and growth habit.

Kirsten Poulsen. Fl. Bright scarlet, single, slightly fragrant blooms borne in clusters on long stems. It is a vigorous, bushy grower, very hardy, and blooms all season.

Louis Philippe. C. Good dark red shrub Rose. Continuous bloom.

Red Radiance. HT. Rosy red form of Radiance.

RED CLIMBING ROSES

Etoile de Hollande. CHT. A strong climbing form of the famous bush Rose.

Paul's Scarlet. LC. Startling brilliant scarlet blooms which seldom fade. Profuse bloomer in spring. Fine for covering fences and walls.

Reine Marie Henriette. CT. One of best red climbers we know. Bright red, pointed buds of good size.

WHITE BUSH ROSES

Caledonia. HT. Creamy white buds opening to beautiful snowy flowers. Plants bloom over a long period. 25 petals.

Frau Karl Druschki. HP. Fine white, sometimes called White American Beauty.

Kaiserin Auguste Viktoria. HT. Free and regular bloomer from early to late. Pure white, on long stems. One of the most satisfactory Southern sorts.

Marie van Houtte. T. The general color is white, but tinted at center with pale lemon and on outer petals with pink.

Snowbird. HT. Lovely white buds opening to a medium-sized double bloom of snow-white with a creamy center. Delicious fragrance. Continuous bloom on a healthy plant.

White Killarney. HT. Long-pointed buds and semi-double, open flowers.

WHITE CLIMBING ROSES

Devoniensis. CT. Probably the strongest-growing Tea in our collection. Creamy white, with delicately shaded pink center. Long lived and most satisfactory.

Lamarque. N. Free-flowering, climbing white Rose with tint of pale yellow. Very fragrant blooms in clusters.

YELLOW BUSH ROSES

Lady Hillingdon. T. Apricot-yellow. Slender, pointed buds. Free bloomer.

Luxembourg. HT. An extremely satisfactory Hybrid Tea Rose for Southern gardens. The flowers are rich apricot-yellow, shaded with copper and lighter yellow at the tips of the petals.

Mrs. P. S. du Pont. HT. Stands in the front rank of yellow garden Roses and can be depended on always to provide admirable yellow buds. It has been awarded high Rose honors, and even today after many years retains its popularity.

Safrano. T. Well known and liked. Saffron and apricot buds and semi-double flowers. Disease-resistant.

Talisman. HT. Orange and copper tones suffused pink. Very popular.

YELLOW CLIMBING ROSES

Fortune's Double Yellow. N. Semi-double, orange-yellow flowers flaked with red, borne along the stems in June and July.

Marechal Niel. N. Deservedly famous old-timer. Full yellow flowers. Sturdy plant.

Perle des Jardins. CT. Most satisfactory climbing yellow Rose in the South.

All Roses on Multiflora Rootstock
\$8.50 for 10

DAYLILIES (Hemerocallis)

DAYLILIES

Few perennials are more adaptable to Florida gardens than are the modern Daylilies. Not only their brilliant coloring, but their fragrance, their unusual hardiness and their long blooming period make them indispensable for garden use. In recent years, enthusiastic growers have developed new strains which vary in color from palest yellow to deep vermilion.

Set the plants at least 2 feet apart. They can be grown with ease in full sun or partial shade, with the exception of those having red tones. These varieties have much better and more typical color when grown in partial shade. Daylilies are not particular as to soil, provided that it is well drained. They benefit from occasional feedings of fertilizer but need very little care.

Plants vary in height, in color and in blooming season and can be used in many ways. They are at home in the perennial border or in the shrub planting. You can find a place for Hemerocallis in your foundation planting, or you can use them in great borders in your garden or as accents with other perennials. Our list of plants is truly representative of the best kinds obtainable.

We cannot ship orders for fewer than five (5) Daylilies (either clumps or bibs), and we ask the indulgence of our customers in making up their orders. This restriction does not apply to customers who come to the Nursery for their plants.

*The varieties marked with an asterisk are deciduous.

Single Division (Bibs)

Jack'n Jill. A pair of very interesting and attractive dwarf-type Daylilies, one evergreen, the other deciduous, to be planted alternately as an edging to the Daylily border. The color is a deep ruby-red and the foliage is low and spreading. The evergreen clone blooms in early April and the deciduous one a few weeks later, giving a continuation of color over a long period. Per pair only.

Kanapaha. (Watkins.) The blooms of clear cardinal-red are completely self-colored. There is no eye zone of deeper tone and no midrib of lighter value. Blooms rather early.

Tamiami. This evergreen plant is very robust and multiplies rapidly. The large, spreading flower of Pompeian red is slightly recurved and gives a fine day-long effect, since it does not roll or fade in the sun. No other available commercial clone exhibits the outstanding soft pinkish red tone that is the salient feature of this selection.

Above varieties, 75c each

Dauntless. (Stout.) Large, fragrant flower with broad, overlapping petals of soft yellow with a faint fulvous flush on each petal. The throat is tinted green. Good in the evening. Midseason.

Emily Hume (Hume.) Extremely robust. The orange-yellow flowers have petals that are twisted, curled and pinched at the tips. Very decorative. Long season.

Goldeni. (Betscher.) Semi-dwarf type with deep orange flowers. Midseason.

Patricia. (Stout.) A large fragrant flower of pale yellow with greenish throat and wide overlapping petals. Sun-resistant and good in the evening.

Vulcan. (Stout.) A beautiful shade of deep maroon with an orange throat. The petals are pointed with deeply recurving sepals. Midseason to late.

Wau Bun. (Stout.) The flowers are large with stiffly recurving sepals. The petals of a soft cadmium-yellow, are broad and spreading with a distinct pinch and twist at the tips. Midseason.

Woodlot Gold. (Cleveland.) A large, fragrant flower of brilliant orange-yellow. Widely separated, fluted petals. Long season.

Above varieties, 50c each

DAYLILIES, continued
on page 18

HEMEROCALLIS

HEMEROCALLIS, continued

Bagdad.* (Stout.) Combination of orange, coppery red and brown. Long season.

Cressida.* (Betscher.) Deep reddish orange with fulvous band. Midseason.

E. A. Bowles.* (Perry.) Flower is pale gold with deeper shades to a reddish orange. Narrow, pointed, widely separated petals. Early.

Florham. Large flowers of rich golden yellow. Stems tall. Full bloom in early June.

Hyperion.* (Mead.) Very large, fragrant flowers of palest yellow. Midseason.

Iris Perry.* (Perry.) Tall-growing, with deep yellow flowers overlaid with bronze. Like Aurantiaca. Midseason.

J. A. Crawford. (Betscher.) Very tall with wide-open flowers of clear light yellow. Long season.

Linda.* (Stout.) The fluted golden petals are flecked with cinnamon. Sepals creamy yellow. Throat of shaded rose. Midseason.

Midas.* (Stout.) Tall with flowers of clear, uniform glowing orange. Early.

Mikado. (Stout.) Golden yellow flower with mahogany-red eye zone. Midseason.

Ophir.* (Farr.) Tall, with great clusters of golden trumpets. Long season.

Semperflorens. (Van Tubergen.) Clusters of deep yellow blooms on widely branched flower stalks. Long season.

Sir Michael Foster. (Müller.) Strong growing with sweet-scented, funnel-shaped flowers. The clear medium-yellow petals are large and fluted. Long season.

Soudan. (Stout.) Rich, glistening yellow flower of the full, recurved lily type, with broad, fluted and overlapping petals. A fine summer bloomer.

Welaka. (Watkins.) Blooms, very freely borne in May, are of good substance and distinctly crepe-like and rippled in texture. The broadly spatulate petals give the flowers a full form that appeals to most gardeners. The throat color—Mandarin orange—fades to the attractive rosy fulvous tone of the outer segments.

Clumps	Each	10
Small, 4 to 5-in. diam....	\$0 75	\$6 50
Medium, 5 to 7-in. diam....	1 00	8 50

Amaryllis. (Betscher.) A fragrant flower of deep rich golden yellow with broad, heavy-textured petals that are barely separated. A long blooming season. Midseason to late.

Apricot.* Deep yellow.

Aurantiaca. Reddish orange.

Citrina.* Pale yellow.

Crown of Gold. Deep orange.

Fulva.* Rusty orange-red.

J. R. Mann. Medium yellow.

Kwanso.* Double, orange-red.

Margaret Perry.* Fulvous red.

Mrs. John J. Tigert.* (Watkins.) This Brazil-red Daylily is strikingly handsome; blooms rather early and very often a second time later in the season.

Orangeman.* A strong grower and very heavy bloomer. Flowers of uniform deep orange. Blooms both early and late.

Pale Moon.* (Cleveland.) Large flowers of palest lemon. Midseason.

Parthenope. (Müller.) Very tall, well-branched stalks with fragrant, pale yellow, trumpet-shaped flowers. Midseason.

Sovereign.* Light yellow.

Vesta. (Stout.) Firm-textured flowers with broad overlapping petals and sepals of deep orange. Midseason.

Clumps	Each	10
Small, 4 to 5-in. diam....	\$0 40	\$3 00
Medium, 5 to 7-in. diam....	60	5 00

Modesty. (Betscher.) Tall-growing, blooming in May and often again in late July and August. The cup-shaped flowers are fragrant and of a delicate, often transparent texture. The reflexed petals are the palest lemon-yellow.

Mrs. A. H. Austin.* (Betscher.) Flowers of a deep, clear orange. One of the best of that color. Midseason.

Serenade.* (Stout.) A delicately tinted flower of harmonious pastel yellows and pinks. The petals are fluted and slightly twisted. This Daylily is particularly pleasing in combination with other spring garden flowers. May, June.

Above varieties, 35c each

Bijou.* (Stout.) Clusters of small flowers are orange, overcast with fulvous red. Late.

Boutonniere.* (Stout.) Tiny flowers with petals of rosy peach and clear yellow sepals. Late.

Summer Multiflora Hybrids.* (Stout.) Clusters of small, clear orange-yellow flowers. Fine for mixed flower arrangements. Long blooming period.

Above varieties, 25c each

FRUITS AND NUTS

BANANAS

- **Cavendish.** Plants tender. Fine fruits.
- **Hart** (Hart's Choice Lady-Finger). A valuable sort; hardier than Cavendish.
- **Orinoco** (Horse Banana). A strong grower, producing small bunches of fruits.

	Each
Medium suckers.....	\$2 00
Large suckers.....	3 00

FIGS

- **Celeste.** Small to medium; violet color; flesh light to rose at center; juicy, sweet, excellent. Hardy. June, July.

	Each	10
18 to 24 in.....	\$0 85	\$8 00
2 to 3 ft.....	1 10	10 00
3 to 4 ft.....	1 50	14 00

MUSCADINE GRAPES

- **Burgaw.** Black, much like Thomas, but is self-fertile and while pollinating other vines will give a good crop itself.
- **Creek.** Very thin skin; large clusters of medium size. Juicy, reddish purple fruit; prolific. Ripens uniformly about October 1.
- **Duplin.** Self-pollinating. Large black fruit in loose clusters. Vigorous and productive.
- **Tar-Heel.** Black, heavy-producing, self-pollinating type. A vigorous grower.
- **Top Sail.** White fruit. Very vigorous but should not be pruned heavily for best yield.
- **Willard.** Self-pollinating. White fruit of extra-good quality. Ripens same season as Scuppernong.

Bare-root.	Each
2-yr.....	\$1 00
3-yr.....	1 50

- **Flowers.** Large, purplish fruits; sweet flavor. August, September.

- **James.** Largest of this group. Black; juicy, and of excellent quality. Prolific. August to late fall.

- **Scuppernong.** The old, popular sort, known and liked for its delicious, musky flavor. Fruit large, bronze-colored; flesh juicy. August, September.

- **Thomas.** One of the best and most popular Grapes. Reddish purple; pulp sweet and tender. August, September.

- **Male Muscadine.** A valuable staminate variety chiefly recommended for planting with other Muscadines to fertilize their bloom and thus insure heavy and regular crops.

	Each	10	100

BUNCH GRAPES

- ↘ **Concord.** An excellent variety that is well known and widely successful. Fruit large, blue-black; flesh sweet and tender.
- ↘ **Delaware.** Small fruits of best quality; thin skin, red or pink. Medium-sized bunches.
- ↘ **Diamond.** A handsome white Grape equal or superior to Niagara in quality, and 10 days earlier. Prolific; very thrifty.
- ↘ **Fredonia.** A new early Grape. Ripens well ahead of Concord and continues to hang on the vine in perfect condition for many days. Blue-black; heavy bunches.
- ↘ **Golden Muscat.** Rich golden color, Muscat aroma. Large, oval, juicy, tender, sweet. Compact clusters.
- ↘ **Ives.** A good grower; very productive. Bunches and fruits large. Very fine black variety.
- ↘ **Niagara.** Strong grower; prolific. Bunch and fruit large. A fine-quality, greenish yellow Grape.
- ↘ **Seneca.** A Grape that is entirely different. Early; bunches of good size, tapering and compact. Oval, golden yellow fruit. Firm texture; the tender skin can be eaten.
- ↘ **Van Buren.** A new extra-early blue variety. Good size; sweet flavor. Very productive.

Concord, Delaware, Diamond, Fredonia, Ives and Niagara.

Bare-root.	Each	10	100
1-yr.....	\$0 85	\$8 00	\$75 00

Gallon cans.....	\$1 15

GUAVAS

- ↘ **Red Cattley.** Used for jellies and for preserving. Fine, dark evergreen foliage. Fruits 1 to 1½ inches across. Good in northern Florida and southward. Each

Gallon cans.....	\$1 75
------------------	--------

LOQUAT

(*Eriobotrya japonica*)

A handsome, large-leaved, medium-sized tree standing several degrees of frost, and a fine ornamental. The yellow, oblong fruit is about as large as a medium-sized plum and has a fine sub-acid flavor. Tree blooms in November to December, and fruits mature in spring.

B&B.	Each

FRUITS AND NUTS, continued

PEACHES

ZONE I. Central and southern Florida; tropical countries.

ZONE II. Eastern north Florida; similar soils and climate.

ZONE III. West Florida, lower Georgia, Alabama, and Mississippi.

ZONE IV. Coastwise Louisiana and Texas.

Ripening time based on north Florida

- ↘ **Angel.** (Zone I. June 20-30.) Large; yellow, washed red; juicy, sub-acid, highly flavored. Bears well while young. Late blooming. Freestone.
- ↘ **Babcock.** (Zones I and II. Midseason.) Small to medium; red with mild, non-acid, white flesh. Bears early. Fruits cling to tree even when ripe. Needs heavy pruning and thinning.
- ↘ **Dorothy N.** (Zones I and II. July 5-15.) Seedling of Angel. Very handsome, large, of fine quality. A good bearer of nearly round, yellow-fleshed fruit. Freestone.
- ↘ **Elberta.** (Zones III and IV. July 5-20.) Large, yellow, red-cheeked; finest quality. Most popular sort in the South. Good in west Florida and north. Freestone.
- ↘ **Hall's Yellow.** (Zones I and II. June 15-25.) Large, nearly round; yellow with red; red at stone. Quality fine. Freestone.
- ↘ **Jewel.** (Zones I and II. May 15-25.) Medium to large; highly colored; finest quality. Choicest market sort for Florida. Very prolific and one of our special lines for many years. Freestone.
- ↘ **Luttichau.** (Zone II. May 25-June 10.) Another special, and a fine market and table Peach. Large; greenish white, marked with red; juicy, finely flavored. Freestone.
- ↘ **Taber.** (Zones I, II, III, IV. June 15-25.) Excellent canning Peach. Fruit very rich and juicy. Tree prolific. Clingstone.
- ↘ **Waldo.** (Zones I and II. May 20-June 3.) Medium size; light yellow with dark red; flesh white, red at stone, juicy, finely flavored. Very prolific. Freestone.

5 to 7 ft.....	2 00	19 00	180 00

PEARS

↘ **Baldwin.** Originated several years ago in Baldwin County, Alabama, this fine Pear is a welcome addition to our list. In size it is comparable to Hood. A midseason bearer of excellent quality fruit. Much finer grained than Pineapple, the Baldwin is juicy and a grand table fruit. Trees are resistant to nematode attack to a remarkable degree. We suggest that you try a few this season; it may be just what you need to complete your Pear collection or your grove.

↘ **Carnes.** Fruit medium to large, rather round in shape and of good color. The flesh is firm and free from grit, juicy, and the flavor is quite apple-like. It matures earlier than our other Pears, beginning in late June and carrying over through July. Blight resistant, and a regular and heavy bearer.

↘ **Hood.** Blight-resisting. Large, yellowish green fruit with white flesh, very juicy, mellow, free from grit, and deliciously flavored. Excellent for every use to which Pears are put. June to July.

↘ **Kieffer.** Large; yellow with reddish cheek; handsome and very juicy. Good flavor when fully ripe September, October.

↘ **Le Conte.** Large, pyriform; smooth; pale yellow. Quality good when properly ripened. A dessert Pear. July.

↘ **Orient.** A promising hybrid for southern growing. Fruit to 3½ inches in diameter with thick skin and rather rough finish. Creamy white flesh of good texture but mild flavor. Fruit ripens here in August, but trees bloom later than Kieffer, which is an advantage in avoiding cold injury. Trees are attractively dark green, vigorous in growth; practically immune to fire blight. Particularly good for canning.

↘ **Pineapple.** Blight-resisting. Large and handsome, with a pleasing odor when ripe. We recommend planting Pineapple and Hood trees for a fine orchard.

Check them before sending in your order.*

**GLEN SAINT MARY NURSERIES HAVE THE BEST SELECTION
OF FRUITS AND NUTS TO CHOOSE FROM FOR YOUR YARD**

PECANS

- ↘ **Big Z.** The trees are symmetrical and grow faster than the average Pecan. The nuts are narrow and nearly as long as Stuart; easy to crack and well flavored.
- ↘ **Curtis.** Of Florida origin. A beautiful, rapid-growing tree and a heavy bearer of very thin-shelled, medium-sized nuts of highest quality.
- ↘ **Frotscher.** A large, oblong nut with very thin shell and of good quality. It is well adapted to planting in the Gulf Coast country, Florida, and southeast Georgia.
- ↘ **Moneymaker.** A medium-sized nut with medium shell, well filled with a rich meat. The tree is an upright grower with dark green foliage.
- ↘ **Schley.** A good tree of average form and size. Nuts medium to large, with very thin shell and highest quality meat.
- ↘ **Stuart.** A large, strong tree with a fine head. Nuts large, medium thin, good quality. It stands the cold better than most other southern varieties.
- ↘ **Success.** Tree sturdy, vigorous, and is a heavy producer of large nuts of average thickness and of good quality.

Bare-root.	Each	10	100
2 to 3 ft.	\$1 75	\$16 50	\$155 00
3 to 4 ft.	2 15	20 00	195 00

6 to 8 ft.	4 75	45 00	425 00

JAPAN PERSIMMONS

- ↘ **Fuyugaki.** One of the best. Oblate, medium to large; deep red skin. Light flesh, non-astringent, very sweet and may be used while still hard; seedless. Perhaps the very best shipper and keeper. Should be in all plantings September, October.
- ↘ **Gailey.** Small, oblate-conical; dull red. Flesh dark about the seeds, firm, juicy. Produces an abundance of staminate flowers for pollenizing other sorts. Valuable in commercial and home orchards.
- ↘ **Hachiya.** Very large and showy; brilliant red skin. Sweet, deep yellow flesh, astringent until ripe.
- ↘ **Hyakume.** Roundish oblong to roundish oblate, large (up to 3 inches long); skin buff-yellow to orange and frequently netted about the apex. Flesh dark cinnamon, firm, sometimes fibrous but of very pleasing quality. October.
- ↘ **Okame.** Large, oblate; orange-yellow to carmine skin. Flesh light and non-astringent when ripe, light brown around seeds, quality fine. Midseason to late.

FRUITS AND NUTS, continued

JAPAN PERSIMMONS, continued

- ↘ **Ormond.** Oblong-conical, small to medium; skin smooth, yellowish red, with scattering dots and whitish bloom, very tender. Flesh orange-red near center with few or no seeds; astringent until soft. Keeps well. Very late November and December.
- ↘ **Taber's No. 23.** Round to oblate, with flat or depressed apex, small; skin red with dotted effect. Flesh very dark and speckled, sweet; seeds numerous—8 to 10. An excellent home fruit. September and October.
- ↘ **Tamopan.** Oblate and very flat, marked by a deep constriction near the stem end, very large (3 to 5 inches across); skin reddish orange, thick and tough. Flesh light orange, astringent until ripe. Seedless. October, November.
- ↘ **Tane-Nashi.** Large to very large, roundish conical, very attractive; skin light yellow, changing to bright red. Flesh yellow, of finest quality; seedless. Prolific bearing quite young. The finest commercial sort and most popular for home use. September, October.
- ↘ **Triumph Seedling.** Medium size, tomato-shaped; skin red. Flesh yellow, with a few seeds, finest quality. Midseason to very late.
- ↘ **Tsuru.** Long, conical (2¼ x 3¼ inches); skin bright orange, reddening as it ripens, with purple bloom while immature. Flesh dark yellow, firm, astringent until very ripe, with few or no seeds. September, October.

Persimmon

PLUMS

- ↘ **Abundance.** Medium to large, round with blunt-pointed apex; pinkish red changing to purplish red with thick bloom and numerous medium-sized dots. Flesh greenish yellow, juicy, sweet or slightly sub-acid; pit small. Cling; best quality. A prolific, strong grower. A popular and profitable early Plum for planting in northern sections and in many parts of the South.
- ↘ **Burbank.** Large to very large, rounded and blunt-pointed; dark red, mottled over yellow ground; thick bloom and numerous large dots. Flesh deep yellow, juicy, sweet, firm; pit small. Cling; quality one of the best. Tree very vigorous; upright branches with large leaves. Very popular both North and South, but not adapted to the Lower South.
- ↘ **Excelsior.** This variety was introduced by Mr. Taber in 1887. Experienced fruit-growers put Excelsior at the top of the Plum list; therefore home-garden owners may expect equally good results. The fruit ripens early in June, is a bright wine-red, 2 inches or more in diameter, with lots of juice and a real Plum flavor. If you like Plums, plant Excelsior.
- ↘ **Kelsey.** Very large, heart-shaped, long-pointed, usually lop-sided with deep suture; greenish yellow sometimes flushed with red, covered with thick bluish bloom; very showy. Flesh light yellow, meaty; flavor rich, pleasant, quality excellent. Prolific and bears while young. Highly recommended for the colder sections, but not dependable far south.
- ↘ **McRea.** Medium size; yellow, overwashed with red. Crimson flesh; juicy, excellently flavored. Prolific.
- ↘ **Red June.** Medium to large, lop-sided; vermilion-red all over with delicate bloom; very showy. Flesh light yellow, firm, moderately juicy, sweet or slightly sub-acid; pit small. Cling; flavor pleasant; quality very good. Tree vigorous and prolific. A good variety.
- ↘ **Satsuma.** Medium to large, broadly conical, with blunt, short point and deep suture; dark, dull red all over with greenish dots. Flesh purplish red; pit small. Free; firm, juicy; quality excellent. A splendid keeper and good shipper.
- ↘ **Terrell.** Cling. Another fine hybrid, larger than the above; red with small dots and mottlings. Flesh greenish yellow, very juicy and aromatic. One of the best.
- ↘ **Wild.** A native wild variety which blooms at the same time as the above and often aids materially in the production of heavy crops.

Bare-root.	Each	10	100
2 to 3 ft.	\$1 10	\$10 50	\$100 00

CITRUS FRUITS

For Colder Sections

Grown at Glen Saint Mary on Citrus trifoliata stock, which is the most cold-hardy understock known. Orders and requests for detailed information on these trees should be directed to our Office at Glen Saint Mary, Fla.

ORANGES

- ↘ **Glen Improved.** An improved strain of Washington Navel, originated by us.
- ↘ **Hamlin.** An excellent, extra-early sweet Orange; very juicy and delicious.
- ↘ **Lue Gim Gong.** Large, heavy, very late, smooth fruit with few seeds, and of highest quality Tree cold-resistant.
- ↘ **Parson Brown.** An old, fine, early variety of high quality and medium size. Cold-resistant.
- ↘ **Pineapple.** The favorite of all midseason Oranges. A heavy producer. Trees upright, with large fruiting heads.
- ↘ **Tangerine (Dancy).** A "kid-glove" Orange of medium size, deep orange color, and rich, spicy flavor. Trees upright, dense, heavy bearing.
- ↘ **Temple.** The very highest of citrus-fruit qualities are found in this peerless Orange. It is strictly a "fancy" fruit from every quality point. Fruits large; fine, deep orange skin, separating easily from the pulp free from "rag"; juicy, delicious. Tree a vigorous grower, bearing freely when very young.
- ↘ **Thompson Navel.** Fruit of medium size, rind/very smooth and thin; pulp juicy, sweet and of firm texture; splendid color and of excellent quality. Ripens early.
- ↘ **Valencia.** (Late.) Tree a strong grower, an early bearer, and perhaps the most profitable of the round Orange group. Fruit keeps well on trees until very late. Size medium; good color; finest quality.
- ↘ **Washington Navel.** A very large, mid-season Orange of excellent quality, and a good bearer on *C. trifoliata* stock. It should be included in home orchards.

SATSUMAS

- ↘ **Satsuma Owari.** Large, flattened; deep orange, with smooth rind, which parts freely from the pulp; seedless, or nearly so. Matures before any of the round Oranges.
- ↘ **Satsuma Silverhill.** Tree is an upright grower, apparently harder than Owari. Fruit similar to the latter, holding on trees perhaps a little longer in good condition.
- ↘ **Satsuma Kawano Wase.** Tree and fruit similar to Owari. Fruit two weeks earlier, ripening before coloring. Smooth, thin rind; very little "rag"

GRAPEFRUIT

- ↘ **Duncan.** One of the very best for all uses. Of good quality; very juicy. Hardest of all the Grapefruits. Season December to May.
- ↘ **Foster.** Flesh purplish pink. Very early and of excellent quality. One of the best.
- ↘ **Glenred.** An outstanding new seedless variety. It closely resembles Thompson Pink, with two important exceptions: whereas the flesh of Thompson is a delicate pink, the flesh of Glenred is dark rich pink, resembling the color of a ripe watermelon, and whereas Thompson does not show its pink color on the outside, the rind of Glenred "blushes" attractively. This characteristic distinguishes Glenred easily from any variety of "white" Grapefruit without the necessity of cutting the fruit. In habit of growth and time of maturity, Glenred approximates Marsh Seedless. The fruit is somewhat larger and commercially seedless.
- ↘ **Marsh Seedless.** A practically seedless variety which can be held on the trees very late. Fine-quality fruit with smooth yellow skin. It bears heavy and regular crops.
- ↘ **Thompson Pink.** A sport of Marsh Seedless, slightly larger, not quite so flattened, of excellent flavor and the flesh is a delicate pink in color. Originated in Manatee County, Florida, and has for many years been a favored variety commercially and in private plantings.

Price on all Oranges, Satsumas, and Grapefruit:

B&B, double above prices.				

KUMQUATS

- ↘ **Marumi.** Tree dwarf, compact, globular. Foliage small, thickly placed. Fruit 3/4 to 1 inch long, round; golden yellow; rind thin; sweet, well flavored; juice and pulp aromatic. Ornamental
- ↘ **Meiwa.** More vigorous than Marumi; well foliaged and handsome. Fruit about 1 to 1 1/4 inches long, round; pulp sweet when ripe. The best Kumquat for eating fresh.
- ↘ **Nagami.** Vigorous; broadly upright; handsome. A very heavy bearer of golden yellow, oblong fruits 1 1/2 to 2 inches long; rind sweet; pulp and juice finely flavored. Tree forms a nice head, more open than Marumi.
- ↘ **Calamondin.** A small citrus fruit 1 1/4 inches in diameter, of orange-red color, somewhat flattened; skin thin, easily removed from the pulp; sections separated as in the Mandarin oranges, juice clear and strongly acid. Makes a pleasant drink.
- ↘ **Eustis Limequat.** New, attractive, acid citrus—a cross of a lime with Nagami kumquat. Tree is vigorous, quickly producing fine crops of acid fruits which make an excellent drink. Fruit oblong, somewhat larger than the Key lime; rind thin, grapefruit color.
- ↘ **Lakeland Lime.** For locations where frost injury is likely. It is about the size of the Mexican or Key lime and its flavor is excellent. Practically ever-bearing; it begins to bloom and bear fruit the first or second year after planting

- ↘ **Meyer Lemon.** Perhaps the hardest of the Lemon varieties. An excellent bearer of large fruits of high acidity. Particularly valuable in central to north Florida and warmer Gulf Coast areas.

GLEN AIR-DRIED PEAT

WHAT TO DO WITH IT

We are fortunate in having one of the finest deposits of pure Sedge Peat in this part of the country. Analysis as determined by commercial chemists, Thornton & Co., of Tampa, Florida, is as follows:

Available Phosphoric Acid . . .	0.04%
Insoluble Phosphoric Acid . . .	0.03%
Total Phosphoric Acid	0.07%
Nitrogen	1.05%
Equivalent to Ammonia	1.28%
pH Value	4.90 (Neutral is 7)

A report from the U. S. D. A., Bureau of Plant Industry, Washington, D. C. to whom we sent samples of Glen Peat, reads in part: "The material is exceptionally uniform in texture, composition and reaction. It consists of fibrous material derived from rootlets and underground stems of sedges and several grasslike plants. Plant remains from Sawgrass are not abundant however, and organic material from Sphagnum mosses is not present. The reaction is acid pH 4.5 to 5.0."

Moisture retention ratio, 4.26 to 1. This means that Glen Peat will hold, when fully saturated with water, more than four times its own dry weight.

Use it for lawns, both old and new—incorporated in the soil when building new lawns, or as top dressing at least once a year on established grass.

Use it to build up humus content of light soils and to improve their moisture-holding capacity.

Use it as a mulch wherever one is indicated, but particularly for acid-loving plants such as AZALEAS, CAMELLIAS, MOUNTAIN LAUREL, GARDENIAS, HOLLY, MAGNOLIA, TEA PLANTS, NANDINA and others.

Use it thoroughly mixed with the soil in planting AZALEAS and CAMELLIAS; its acid reaction will help keep these plants in the best possible condition.

Price in sacks \$1.50 per 100 lbs.

If larger quantities or truckloads are desired, write us for quotations. Minimum order shipped, 100 pounds.

100 pounds of dry Peat spread $\frac{1}{2}$ inch deep will cover an area 5 x 7 feet or 35 square feet. A 20-yard truckload at about 800 pounds to the yard, $2\frac{1}{2}$ yards to the ton, will cover approximately 5600 square feet, $\frac{1}{2}$ inch thick or 2800 square feet 1 inch thick.

HORTICULTURAL BOOKS AVAILABLE THROUGH US, POSTPAID

THE AFRICAN VIOLET.

Helen Van Pelt Wilson. \$2.50.

A beautiful book covering every aspect of culture, listing 175 varieties. Profusely illustrated. Highly recommended for Saintpaulia fans everywhere!
